

Odontograma de desgaste

The chart is a standard FDI dental notation diagram for a dental wear assessment. It shows the upper and lower dental arches with teeth numbered 11-28 for the upper arch and 41-48 for the lower arch. The chart is flanked by data tables for each tooth, each containing columns for 'D' (Deciduous) and 'M' (Mixed) and rows for 'R' (Right) and 'L' (Left). The upper arch data tables are numbered 13-14, 12-13, 11-12, 11-21, 21-22, 22-23, and 23-24. The lower arch data tables are numbered 44-43, 43-42, 42-41, 41-31, 31-32, 32-33, and 33-34. In the center of the lower arch, there is an 'Exemplo:' section with a table:

nome do paciente	
9	11/10/20
3	3
M	M

Annotations for the example include: 'etapa #', 'data', 'diastema', 'reduzido face(s)', and 'quantidade de desgaste realizada'.
